

Life-Threatening Allergy Policy

The Harvard Public School District is committed to promoting actions, behaviors and learning that create a healthy and safe environment for students and staff with life threatening allergies.

*Pursuant to Massachusetts Department of Public Health regulations, the Districts shall strive to provide and maintain a safe and secure environment for students with diagnosed life threatening food allergies. A comprehensive approach to compliance with the policy requires, but is not limited to, a focused effort by parents/guardian, students (when developmentally appropriate), school staff, school physicians and bus/van transportation personnel. The Districts will support procedures that include, but are not limited to; education, training, emergency plans and procedures. The major goals of these procedures are to reduce the risk of exposure to allergens during the school day that could trigger life-threatening responses and to optimize emergency responses in the event that life-threatening reactions do occur.
