

Employee Exit Interviews

In its quest for continual understanding and improvement of the district, the superintendent will strive to meet to conduct exit interviews with all professional staff at the culmination of their employment within the district.

Recognizing that each employee bring differing perspectives and that each position of employment carry differing levels of expectations and requirements, exit interviews will broadly seek to capture input and comment around but not limited to the following criteria; reason(s) for leaving, student achievement, overall level of job satisfaction, climate and culture assessment, and suggestions or recommendations for improvement.

Results and findings of exit interviews will be used by the Superintendent in his or her efforts toward continued school district improvement.
